ALICE Update

Our evacuate drill was extremely well executed on November 16. Students did exactly what they were supposed to do and followed directions. The drill showed us that the decision to implement ALICE training was the right one. When we can evacuate the building in less than a minute, we can save lives.

Students will learn about "counter" as the last component of the ALICE protocol. After that, we will have a full-scale school drill that will allow for the teachers to make a decision about their response based on the information provided about an intruder.
